

Simplify password management to easily control credentials on-premises and in the cloud while reducing IT support costs and improving login security.

DATA SHEET

Bravura Pass

Our hyper-connected world faces a paradox: increased security measures often lead to decreased security. Users, overwhelmed by a multitude of credentials, resort to risky behaviors like reusing weak passwords, creating a perfect storm of vulnerability, where convenience outweighs caution.

As cloud services become ubiquitous, the stakes are higher than ever. Single-factor authentication is no longer sufficient against threats. Help desks are inundated with password-related issues, driving an urgent need for change.

It's time for a paradigm shift in digital access management – one that balances robust security with user-friendly simplicity. We need a solution that addresses the root of the problem, harmonizing protection and ease of use in our increasingly complex digital landscape.

Bravura Pass, a best-in-class component of the Bravura Security Fabric, offers advanced password management features to empower users and your help desk while enhancing overall security.

Password Synchronization Efficiently manages passwords across your organization, simplifying credential management and synchronizing passwords across modern and legacy systems to reduce login problems and help desk calls. Customizable password complexity rules and change frequency enhances security. Updates are triggered by AD changes or user updates.

Self-Service Password Reset Enables users to reset passwords and PINs and unlock encrypted drives without IT intervention. Extends to tokens, smart cards, security questions, certificates, and biometrics. Users can initiate changes through Active Directory or a user-friendly web portal, reducing login problems and help desk calls.

Assisted Reset Empowers the Help Desk to securely expedite password reset calls without the need to elevate their access or the call. Help Desk analysts can reliably identify and authenticate callers before unlocking a users account or resetting and expiring their password.

Federated Single Sign-On (SSO) and Strong Authentication Enhances account security with strong authentication. Offers an easy-access launchpad for cloud services. Features multi-factor authentication, a built-in two-factor smartphone app, and integration with existing systems like RSA SecurID and Duo Security.

BEST-IN-CLASS SOLUTIONS. ONE MODULAR SECURITY FABRIC.

Automate compliance while automating identities, security entitlements, and credentials, for both business users and privileged accounts, on-premises and in the cloud. Our best-in-class solutions have helped banks, Fortune 500 companies, and universities around the world protect their companies over the last two decades against increasing cybersecurity threats.

Bravura Pass Plus

Give users the ultimate convenience of forgetting their passwords forever. Give organizations revolutionary control of all passwords with one-click re-secure for breach protection.

Bravura Safe

Beyond SSO and privilege, manage and vault decentralized secrets and passwords. Auto-generated credentials are safely under lock and key for seamless user access.

Bravura Identity

Identity administration and access governance with full process automation, on-premises and in the cloud.

Bravura Privilege

Frictionless, time-limited privileged access to reduce IT security risk and enhance accountability. Facilitate password randomizations and authorize access with a highly available, geo-redundant solution.

Bravura Cloud

More than a tool, it's a strategic partner to deliver security insights to enhance and maintain secure, efficient, and compliant security operations.

Self-Service Encrypted Drives Unlock enables users to unlock encrypted drives via a self-service portal, saving IT resources. Authorized users can access scrambled information without IT assistance. Maintains security through user authentication before unlocking drives, allowing IT teams to focus on higher-priority tasks.

Access Anywhere Users have options to access Bravura Pass for resolving login issues: through the PC login screen, via a dedicated smartphone app or by using a self-service phone call through Interactive Voice Response.

Comprehensive Connector Ecosystem Enhances identity and access management with a versatile suite of connectors, tailored for modern enterprises. These connectors offer bidirectional capabilities, enabling both discovery and provisioning across various systems and applications. This allows IAM professionals to implement efficient, cost-effective identity governance solutions without additional licensing or custom development, optimizing operations and security throughout the IT infrastructure.

Key Benefits

- **Improved ROI and Reduced IT Support Costs** By implementing Bravura Pass, organizations can achieve up to an 85% reduction in password-related help desk calls. The self-service options and streamlined password management significantly alleviate the burden on IT support teams.
- **Enhanced Security** Bravura Pass allows organizations to strengthen password complexity rules and change frequency. The implementation of strong authentication measures, including two-factor authentication for critical actions, further bolsters security across the enterprise.
- **Improved User Experience** Users benefit from having fewer passwords to remember and manage. The self-service options and easy access to multiple applications through SSO create a smoother user experience.
- **Increased Productivity** With fewer login problems and quick, self-service resolution of password issues, users can focus on their work without frequent interruptions due to access-related challenges.
- **Reduce Elevated Privileges** With Bravura Pass, you can reduce the number of IT support staff with elevated privileges. This reduction makes your IT practices more secure.
- **Streamlines Help Desk Support** Bravura Pass enhances IT support efficiency by authenticating both the help desk analyst and the caller before enabling password or PIN reset. Support technicians do not require administrative rights, and the system can automatically create, update, or close tickets related to password issues.

Bravura Pass Reviews

By Bravura Security in Password Management Tools

4.8 ★★★★★ 15 Ratings

“We have been users since 2014 and are very happy to have Bravura Security as our solution vendor.”

“Best tool to onboard and offboard servers or accounts easily and easy to understand and very accurate results.”

“Bravura Security fulfills our need for Identity and Password management. The solutions are smooth and the password management works nice when compared to Symantec.”

“The professional services personnel worked closely with our people and went the extra mile to resolve any issues we had during the installation, configuration, and implementation phase. Our implementation timeline and requirements changed mid-project, and Bravura Security helped us realign to adapt to the new requirements.”

“My company had a lot of complex requirements to implement. We had plenty of challenges to overcome with customization and two-factor authentication. Overall, Bravura Security delivered.”

“Bravura Security’s Password Manager is one of a kind; it helps organizations to manage and secure passwords along with timely randomization. User’s credentials are auto-rotated and other internal components (Active Directory) can be integrated.”
