

Our converged and modular security fabric empowers all-sized institutions to safeguard data by gaining visibility and control across disparate and homegrown systems, maintaining a secure, compliant IT environment aligned with their educational mission. We proudly serve over 7 million users with identity and access management, analytics, privileged access, and password governance.

## DATA SHEET

### A Modular Approach That Delivers Immediate Value with the Bravura Security Fabric

Universities and colleges are increasingly recognizing the need for overcoming technical debt and creating a secure academic and business enablement to effectively serve their students, faculty, and staff. This entails facilitating a smooth onboarding and offboarding process for affiliated individuals while ensuring timely and appropriate access to necessary resources. By adopting an automation-focused strategy, universities and colleges can streamline these processes across all departments and reap additional benefits such as turning compliance, risk mitigation, and reduced IT support costs into outcomes.

With its pattern for higher education institutions, the Bravura Security Fabric protects student, staff and affiliate identities independent of location. Our platform combines five best-in-class products to create a secure digital environment for your entire institution:

- **Bravura Identity** Identity store, rules, governance, and policies.
- **Bravura Pass**: Simplified user credentials management.
- **Bravura Privilege** Frictionless, time-limited, elevated access.
- **Bravura Safe**: Zero-knowledge ungoverned password vault and manager. Add FIDO2 true passwordless multi-factor authentication.
- **Bravura Cloud**: Identity analytics engine turning insights into action.

#### Synchronize Seamless Identity Journeys

Ensure student, staff and affiliate info is accurate and in sync through multiple systems of record. The Bravura Security Fabric eliminates manual processes with automation and replaces multiple identity, password and privileged access platforms with a holistic solution. Start small and grow big as your needs evolve.

#### Reduce Total Cost of Ownership

The Bravura Security Fabric automates processes, reduces complexity and shortens on-premise, cloud and SaaS deployments to lower total cost of ownership. Our Solution Delivery services further reduce costs by streamlining implementation, integration and deployment processes.

### BEST-IN-CLASS SOLUTIONS. ONE MODULAR SECURITY FABRIC.

#### Bravura Identity

Identity administration and access governance with full process automation, on-premises and in the cloud.

#### Bravura Pass

Make login security processes and credential management seamless and secure for passwords, tokens, smart cards and biometrics. Auto-rotate passwords for all users without interrupting their logins.

#### Bravura Privilege

Frictionless, time-limited privileged access to reduce IT security risk and enhance accountability. Facilitate password randomizations and authorize access with a highly available, geo-redundant solution.

#### Bravura Safe

Beyond SSO and privilege, securely empower users to manage and vault decentralized secrets and passwords. Auto-rotated credentials are safely under lock and key for seamless user access.

#### Bravura Cloud

IGA planning simplified. Confidently refine identity management policies, ensuring alignment with dynamic academic environments. More than a tool, it's a strategic partner in maintaining a secure, efficient, and compliant campus.

## Empower Academia Through Identity Lifecycle Management

The Identity Lifecycle Management strategy manages identities through the entire life cycle, from provisioning to de-provisioning. An ILM platform like the Bravura Security Fabric simplifies identity management, giving you tools to holistically create and manage IDs, even for hundreds or thousands of users:

- **Student identity management:** Create and manage fluid IDs all from one platform to support learning with student-based access, and employee-level access for working hours.
- **Faculty identity management:** More institutions are turning to adjuncts and visiting professors to meet critical teaching and budget needs. Scale to add and retire credentials as needed.
- **Alumni identity management:** Support a user-friendly SSO experience so your alumni can help your institution carry out its mission from anywhere.
- **Service Account Management:** Simplify privileged service account management across your workforce.
- **Administrative Identity Management:** Easily manage administrative identity and privilege access across your institution. Ensure all users have the appropriate access to resources.
- **Vendor or Supplier Identity Management:** Manage your vendors and their access to sensitive information.
- **AI Identity Management:** Stay ahead of a growing need to manage provisioning and de-provisioning AI identities.

## Integrate Through the Largest Ecosystem

All your institution's system infrastructure and applications need to work together with your identity and access solution out of the box. Bravura Security offers the largest ecosystem with more than 100 connectors and compatibility with:

- Unique connectors/integrations specific to each university that are legacy/homegrown.
- Human Resources Management Systems (HRMS) to manage various HR functions, including recruitment, payroll and benefits.
- Student Information Systems (SIS) to manage student data, including enrollment and grades.
- Financial Management Systems to manage the institution's financial operations, including budgeting, accounting and financial reporting.
- Plus many more. REST and SOAP APIs are also available.
