

Bravura Pass Plus is an innovative new password management solution that delivers empowering password-free user experiences, instant breach recovery, lockout prevention, and powerful, analytics-driven compliance.

DATA SHEET

Bravura Pass Plus

With Bravura Pass Plus, you can deliver a password-free user experience and respond to security breaches with lightning speed. This solution provides users instantaneous access to securely vaulted passwords and enables IT teams to perform organization-wide password refreshes as needed. Such capabilities dramatically minimize the risk of lockouts and ensure uninterrupted business operations under all conditions. Additionally, the powerful Password Risk Dashboard acts as your command center, offering crucial identity analytics to fortify compliance strategies and enhance overall cyber defense.

User Empowerment Through Simplified Access

Bravura Pass Plus offers a password-free user experience by securely storing credentials and automating password management, thereby reducing the cognitive burden on users, and decreasing the likelihood of security breaches due to password fatigue. Features like autofill and automated password updates eliminate the need for users to remember complex passwords, simplifying access while maintaining security.

Breach Recovery and Rapid Response

Bravura Pass Plus enables rapid recovery from breaches with its one-click re-secure feature, providing instantaneous reset and redeployment of user credentials, minimizing downtime. The rapid response aids in maintaining operational continuity, ensuring that businesses can swiftly recover from threats with minimal interruption to workflow.

Centralized Control and Risk Mitigation

Centralized control within Bravura Pass Plus enables IT teams to efficiently manage password risks and mitigate potential threats with robust governance tools. Implementing automated password management across the organization ensures consistent security practices and reduces human error, the primary cause of password-related breaches.

Compliance and Enhanced Security Measures

Bravura Pass Plus reduces reliance on traditional passwords, frequently targeted by cybercriminals, and enhances compliance and security with robust defenses against unauthorized access. Additionally, it ensures adherence to regulatory standards, equipping companies with an audit-ready system that withstands scrutiny and protects against credential-based attacks.

BEST-IN-CLASS SOLUTIONS.
ONE MODULAR SECURITY
FABRIC.

Bravura Pass

Make login security processes and credential management seamless and secure for passwords, tokens, smart cards, and biometrics. Auto-rotate passwords for all users without interrupting their logins.

Bravura Safe

Beyond SSO and privilege, securely empower users to manage and vault decentralized secrets and passwords. Auto-rotated credentials are safely under lock and key for seamless user access.

Bravura Cloud

IGA planning simplified. Confidently refine identity management policies, ensuring alignment with dynamic environments. More than a tool, it's a strategic partner in maintaining a secure, efficient, and compliant organization.

Bravura Security Fabric

Draw on decades of experience from a well-respected leader. Strengthen security, manage identities and lower IT costs with the only converged solution for identity access management, password governance, and privileged access management.

Get Started Quickly with Bravura Pass Plus

Experience a swift and standardized deployment, bringing our cutting-edge solutions online within just a few weeks. This rapid implementation not only accelerates your time to value but also ensures you quickly harness the full potential of your investment.

Our team collaborates with you to collect all necessary details to configure your baseline deployment, tailored to your organizational environment. Once deployed, you have full control of your solution. Comprehensive online guides and documentation are available to help you effectively manage and maintain Pass Plus.

Technical Specifications

The standard Bravura Pass Plus deployment includes the following to get you started:

- Bootstrapped Pass Plus SaaS solution for orchestrating, synchronizing, and auditing end user password rotation
- Integration with up to two user directories (AD, LDAP, or Entra ID) for user identities and password management
- Email support for administrative and end user email notifications
- Choice of MFA (Multi Factor Authentication) for logging in to Pass Plus: SAML, Bravura OneAuth, or Email OTP
- Assisted reset user verification: Push-based verification using Bravura OneAuth, Okta, Duo, or Microsoft Authenticator

Expand Capabilities Through Extensive Integrations

Consider enhancing your Bravura Pass Plus solution with optional expert services or self-implementation. Add tailored integrations that extend password management capabilities and enrich analytics to meet your specific business needs. The platform can be extended via:

- A comprehensive ecosystem of [target system connectors](#)
- A powerful GraphQL API for analytics and reporting in third party solutions
- Plus a comprehensive set of other built-in features just waiting to be activated!
